## 1. ABOUT THIS GUIDE

---

### Objectives and target audience

This guide describes how to install and configure the Skrill Plentymarkets module. It assumes that you have an existing Plentymarkets installation.

### Conventions used in this guide

The table below lists the conventions used in this guide.

**Table 1-1: List of conventions**

Convention	Description
Code example	Used to illustrate example code, functions, and commands.
<i>File path</i>	Used to indicate a file path or folder structure.
Glossary	Glossary term
<b>Menu1 &gt; Menu option2 &gt;</b>	Indicates a menu path.

---

## 2. INTRODUCTION

---

### **What is the Plentymarkets module?**

Plentymarkets is an eCommerce platform, which provides online merchants with a flexible shopping cart system, as well as control over the look-and-feel, content, and functionality of their online store.

Plentymarkets has been fully integrated with Skrill's online payment solution called Quick Checkout. Installing and configuring the Skrill Payment Solution module provides a simple, secure, and convenient option for connecting to Skrill's online payment processing platform via Plentymarkets.

Skrill customers using Plentymarkets have access to a wide range of card and alternative payment methods.

### **Signing up for a Skrill account**

Before you can start accepting payments through Skrill, you need to open a free merchant account by completing the online application form [here](#).

Once your application is approved you can configure your Skrill credentials in your Skrill merchant account and then copy them in your Plentymarkets backend and start taking payments.

## 3. INSTALLING AND CONFIGURING PLENTYMARKETS

### Secret Word and API Password

It is mandatory to setup a secret word and API/MQI password for your Skrill merchant account before configuring the Skrill Plentymarkets module. The secret word is used to authenticate the data sent back to your Plentymarkets server after payment. You must obtain the IP address of your Plentymarkets server to configure the API/MQI password.

1. Log in to your Skrill merchant account at [www.skrill.com](http://www.skrill.com)
  2. Go to **Settings >> Developer settings >> API / MQI / GSR / CVT Management (Figure 3-1)**.
  3. Set API / MQI Password using the toggle, type and confirm by clicking **Save**.
  4. For each section, specify the IP address(es) or IP address range of your Plentymarkets server. This prevents payment or money transfer requests from other IP addresses if your secret word or API password is compromised. All requests from other IP addresses are denied. Access can be granted to:
    - A single IP address (e.g., 145.76.160.206 using the example above).
    - Multiple IP addresses, separated by space (e.g., 192.168.0.2 10.0.0.2).
    - A subnet in CIDR notation (e.g., 192.168.0.0/24).
  5. Set Secret Word using the toggle and click **Save** to confirm.
- Note:** Your Secret Word must contain at least: 8 characters, 1 uppercase letter, 1 lowercase letter, and 1 number.

The screenshot displays the Skrill merchant account settings interface. At the top, the Skrill logo is on the left, and utility links for 'DISPLAY TEST ACCOUNTS', 'HELP', and a user profile 'Shweta Kale.1' are on the right. A left-hand navigation menu includes options like Home, Transfers, Banking, Balances, All Transactions, Settings, Account Settings, Developer Settings (highlighted), Wallet Label Settings, Support, Notifications, and Merchant Information. The main content area is titled 'Developer Settings' and includes a sub-header 'Configure API and security settings for your wallet account'. Below this, a table lists four wallet accounts: CASINO-US (ID: 309310256), BET365-BULGARIA (ID: 308760226), IBET420 (ID: 308760194), and BetOnline-Asia (ID: 306279907). Underneath, the 'Developer Settings : CASINO-US' section is shown with three tabs: 'Wallet IP Whitelisting', 'API / MQI / GSR / CVT Management' (selected), and 'API Documentation'. This section contains five settings, all of which are enabled and have a 'Whitelisted' status: 'Automated Payment Interface (API)' (3 IP's Whitelisted), 'Merchant Query Interface (MQI)' (3 IP's Whitelisted), 'Gateway Secure Restriction (GSR)' (5 IP's Whitelisted), 'Set API / MQI Password' (Enabled), and 'Set Secret Word' (Enabled).

The screenshot displays the 'Developer Settings' page for a 'CASINO-US' account. At the top, there are four tabs: 'CASINO-US' (ID: 309310256), 'BET965-BULGARIA' (ID: 308760226), 'IBET420' (ID: 308760194), and 'BetOnline-Asia' (ID: 306279907). The 'Developer Settings : CASINO-US' section is active, showing sub-tabs for 'Wallet IP Whitelisting', 'API / MQI / GSR / CVT Management', and 'API Documentation'. The 'API / MQI / GSR / CVT Management' sub-tab is selected, displaying five configuration panels:

- Automated Payment Interface (API):** Enabled - 3 IP's Whitelisted. Includes a list of secure IP addresses: 8.8.8.8, 9.9.9.9, and 11.12.31.12.
- Merchant Query Interface (MQI):** Enabled - 3 IP's Whitelisted. Includes a list of secure IP addresses: 1.2.2.2, 5.6.3.2, and 12.1.2.3.
- Gateway Secure Restriction (GSR):** Enabled - 5 IP's Whitelisted. Includes a list of secure IP addresses: 0.1.2.3, 10.152.252.185, 10.152.252.186, 3.5.4.3, and 1.2.3.5.
- Set API / MQI Password:** Enabled. Fields for Current Password, New Password, and Confirm Password.
- Set Secret Word:** Enabled. Fields for New Password and Confirm Password.

**Figure 3-1: Configuring a Secret Word and API/MQI Password**

### Installing Skroll plugin in Plentymarkets:

The next stage of the Plentymarkets integration is to configure the Plentymarkets module to connect to your Skroll account. The steps are as follows:

- Go to Plugins »Purchases.
  - All plugins purchased on plentyMarketplace will be displayed here
- Click on Install plugin in the line of the plugin.
  - The Install plugin window will open

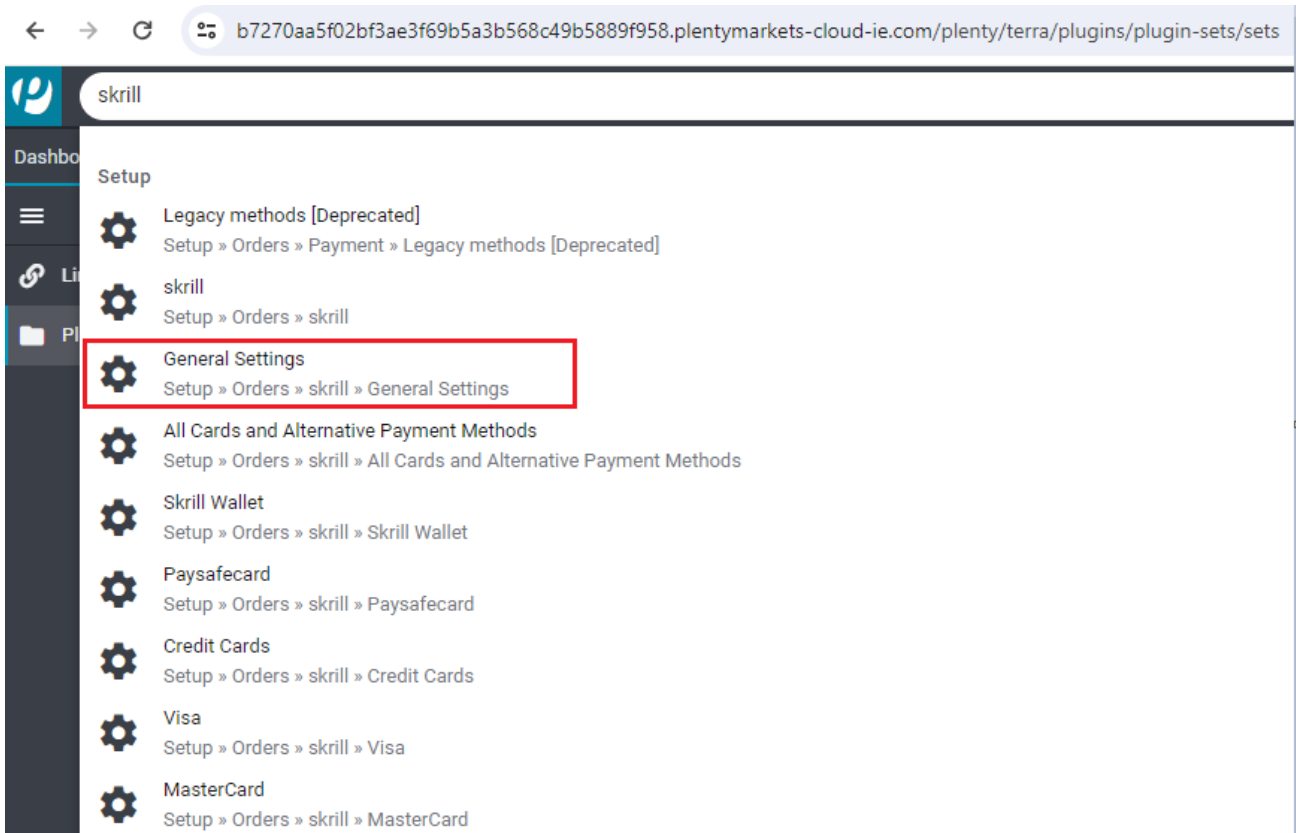

- Select the plugin version from the drop-down menu.
  - The newest plugin version is pre-selected
- Click Install.
  - The plugin will be installed and available in the plugin overview

Refer to [this link for more details.](#)

### Configure Skrill in Plentymarkets

- Type Skrill in the top right menu.
- Click General Settings. **(Figure 3-2)**
- Complete all requested information **(Figure 3-3)**.

**Figure 3-2: Search for Skrill General Settings**

### General Settings

Merchant ID *	<input type="text" value="58010731"/>
	Your Skrill customer ID. It is displayed in the upper-right corner of your Skrill account.
Merchant Account (email) *	<input type="text" value="merchantemail@gmail.com"/>
	Your Skrill account email address.
Recipient *	<input type="text" value="Shop Receipt"/>
	A description to be shown on Quick Checkout. This can be your company name (max 30 characters).
Logo Url	<input type="text" value="https://www.skrill.com/fileadmin/content/images/brand_centre/SI"/>
	The URL of the logo which you would like to appear at the top right of the Skrill page. The logo must be accessible via HTTPS or it will not be shown. For best results use logos with dimensions up to 200px in width and 50px in height.
Shop Url	<input type="text" value="https://yourmerchantshop.com/"/>
MQI/API Password *	<input type="password" value="....."/>
	When enabled, this feature allows you to issue refunds and check transaction statuses. To set it up, you need to login to your Skrill account and go to Settings -> then, Developer Settings
Secret word *	<input type="password" value="....."/>
	This feature is mandatory and ensures the integrity of the data posted back to your servers. To set it up, you need to login to your Skrill account and go to Settings -> then, Developer Settings.
Username	<input type="text" value="abc123"/>
	Username for Plentymarkets admin page
Password	<input type="password" value="....."/>
	Password for Plentymarkets admin page

Figure 3-3: Skrill Settings with example values in Plentymarkets backend

## Configure Skrill Settings

Configure the Skrill Settings as follows:

1. Enter your Skrill Merchant account ID in the Merchant ID field. This is the Customer ID of your merchant account.
2. Enter the processing email of your Skrill merchant account.
3. Enter the API password and Secret word that you set up in the previous section.
4. Either enter a name for your store in the Recipient field to display to customers within the Skrill Payment Form.
5. **Optional** - Enter a URL of a logo to be displayed on the Skrill Payment Form in place of the Recipient text. This URL must be in HTTPS format (begin with https://).

Table 3-1: Skrill Settings

Field Name	Description	Format/ Example
Merchant ID	Your unique merchant identifier. This is the Customer ID of your merchant account.	58010731
Merchant Account (processing email)	The processing email address which is linked to your Skrill merchant account (created by you when you first signed up for a Skrill merchant account).	techpubs@skrill.com
Recipient	<i>Optional</i> - A description of your shop. This will be displayed on the Skrill Payment Form if you do not provide a Logo URL.	Demo Shop
Logo URL	<i>Optional</i> - Link to the URL of a logo, to be displayed on the Skrill Payment Form. Must be in HTTPS format.	<a href="https://www.skrill.com/fileadmin/content/pdf/acme.png">https://www.skrill.com/fileadmin/content/pdf/acme.png</a>
Shop URL	URL for the home page of your shop without the index.php e.g., if your shop is located at <a href="https://myshop.com/index.php">https://myshop.com/index.php</a> you would enter <a href="https://myshop.com">https://myshop.com</a> .	<a href="https://myshop.com">https://myshop.com</a>
MQI/API Password	The API password. This field is mandatory. It allows the Plentymarkets server to receive payment information.	N/A
Secret word	Enter the secret word configured for your Skrill account here. This feature is mandatory and ensures the integrity of the data posted back to your Plentymarkets servers.	N/A
Username	Username for your Plentymarkets admin.	N/A
Password	Password for your Plentymarkets admin.	N/A

## 4. DISPLAYING PAYMENT METHODS

You can select the payment methods to display to your customer using the Payment Configuration tab. The module has a series of payment method sections for each of the payment methods supported by Skrill. Refer to the below figure.

Figure 4-1: Example Payment method section

For each payment method, specify whether it should be enabled (Table 4-1) in the list of Payment methods displayed in the Plentymarkets Checkout. For each separate payment method full supported country list will be visible at the top of the page (Table 4-1). See the [Skrill Quick Checkout Integration Guide](#) for a full list of countries and an up-to-date list of the countries where each payment method is supported. The payment methods are displayed in order of popularity in the customer's country.

Table 4-1: Payment Method Settings

Field Name	Description
Enabled	Determines whether this Payment method is displayed - Yes = display, No = Do not display. Under the Enabled setting is a list of the countries that support this payment method. If a Payment method is enabled but the customer's country is not supported (determined by the country set in the billing address the customer chose in the Plentymarkets Checkout) then it will not be shown.
Show Separately	Always set this setting to Yes where available.

Please note that if the payment option is not enabled for your Skrill merchant account, enabling in from the backend would not make the payment option visible. You will need to contact [merchantsupport@paysafe.com](mailto:merchantsupport@paysafe.com) to discuss activating the specific payment option.

## All Cards and Alternative Payment Methods

This special payment option launches the Skrill Payment Form with multiple tabs showing all the supported Payment methods available in the customer's country . The logo for this Payment option in the Plentymarkets Checkout payment information section is in (Figure 4-2) .

## 5. CUSTOMER EXPERIENCE

This section describes the customer's checkout experience when using the Skrill Plentymarkets module.

**Note:** We only describe the Checkout process from the payment selection step onwards as the previous steps are unchanged.

The steps are as follows:

1. Click a payment method from the list of available payment methods (this list depends on the customer's country, the payment options configured for your Skrill account, and the payment options configured in the Skrill Plentymarkets Module.

### Shipping method

## 2. Enter Payment details in the Skrill Payment Form.

The screenshot displays the Skrill payment form for a 10.00 EUR transaction in Germany. The form is structured as follows:

- Country:** Germany (dropdown menu)
- You pay:** 10.00 EUR (with an information icon)
- Pay with credit or debit card:**
  - Card number:** 4017 0423 6103 1490 (with a lock icon)
  - Card type:** VISA
  - Requirement:** Card must be in your name
  - Expiry date:** 03/30 (with MM/YY label)
  - CVV:** 143 (with a lock icon and a link to "How to find your CVV number")
  - Card holder name:** John Doe (with a note: "Type the name exactly as it appears on the card")
  - Email:** john.doe@gmail.com (with a note: "We'll send a payment confirmation to this email address")
  - Confirmation:**  I confirm I wish to store these card details for subsequent payments.
- Buttons:** A purple "Pay" button with a lock icon and a "Back" link.

Figure 5-2: Enter Payment Details in the Skrill Payment Form

3. Click **Pay Now** to complete the payment. If all is correct, the payment form will as shown:

**Figure 5-3: Successful Payment**

4. Click **Continue** to return to the Plentymarkets Order Confirmation screen. This screen contains the unique order number for this payment.

**Ceres** Living room ▾ Office ▾

Warehouse	KS Sales		Ext. Order number		Entry is gross, including costs relating to payment method						
Outgoing items	not booked		Customer reference		07.07.2020 17 : 34						
Shipped on	<input type="text"/>		Packages		1						
Return date	<input type="text"/>		Package number								
Currency	EUR										

**Figure 6-1: Payment Information Example**

The Payment Information section includes the following information shown:

1. The payment option selected in the Plentymarkets Checkout.
2. The payment status.
3. The country the payment order originated from. This information is obtained by Geolocation using the Customer's IP address.
4. The currency the order was placed in using a 3-digit ISO 4217 currency code e.g., EUR for Euros.

## Refunding Payments

The process for Refunding customer payments is as follows:

1. Go to **Orders > Orders**.

Figure 6-2: Search for Order

2. Carry out the search to display orders.
3. Open the order for which a credit note should be created. Note that the orders can only be opened in the list view.
4. On the top click on **Create Orders** (basket icon) > **Create Note**

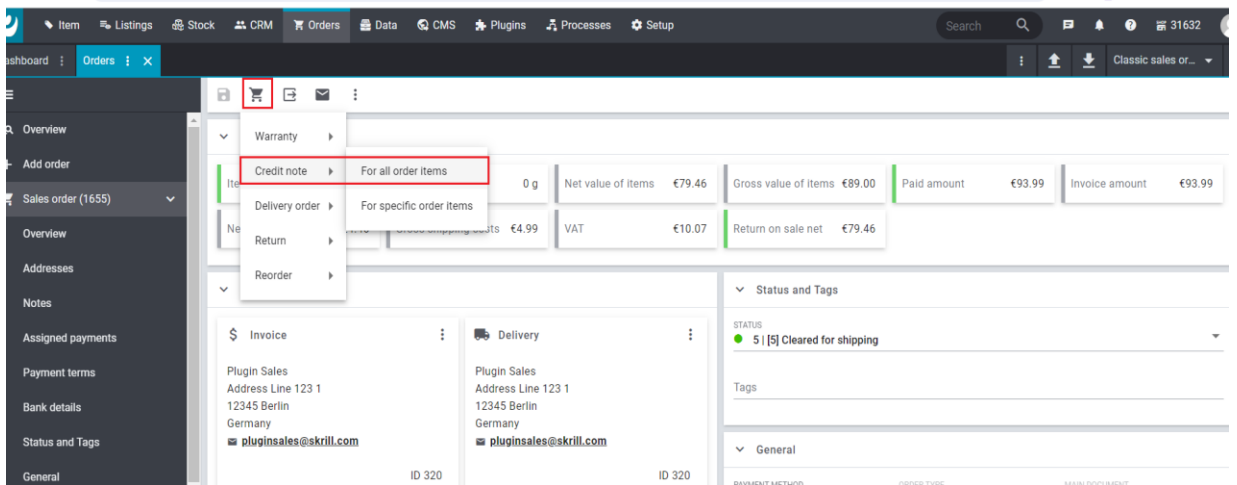

Figure 6-3: Refund Payment

5. **Save** the settings (floppy icon)
6. The credit note order is created which will trigger the refund event from Skriff plugin. This is visible if you scroll down to the bottom of your order and also over **Orders > Payments** section

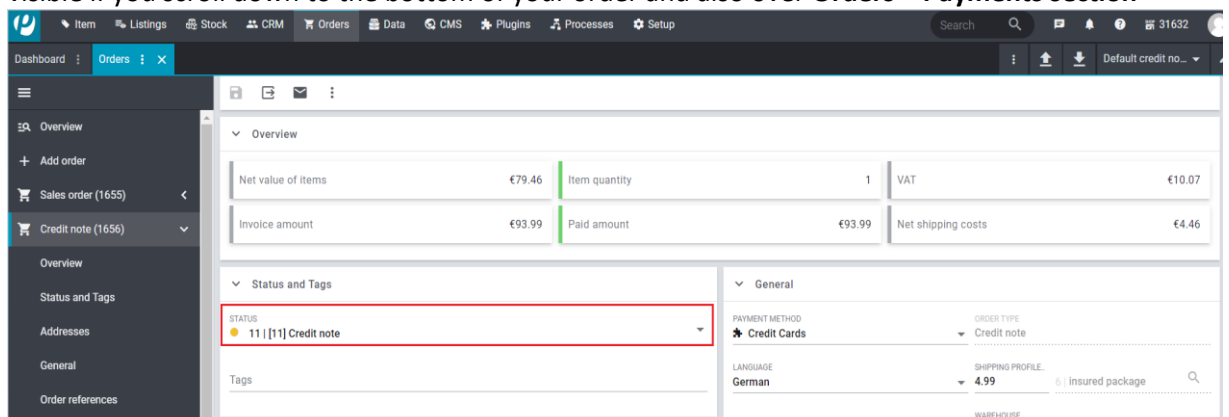

Figure 6-4: Credit Note/Refund Completed.

**Figure 6-5: Refund Completed and visible.**

## 7. TESTING

We provide two test cards shown in the table below for use with test merchant accounts. When using these card numbers enter an expiry date in the future and a random CVV number.

**Table 7-1: Test Cards**

Brand	Card Number
MasterCard	5438311234567890
Visa	4000001234567890

Should you wish to test Skroll in DEMO shops please get in touch with Skroll support at [newbusiness@paysafe.com](mailto:newbusiness@paysafe.com), so we can provide you with access.
